 To: "joebanaszak@yahoo.com" <joebanaszak@yahoo.com>

Hi Joe,

Per our phone conversation, I wanted to send you some examples of airport development, at neighboring airports. These airports used their federal entitlements, and subsequent state and local shares, to pay for the following projects.

Crandon

- Seal coating pavements
- Runway extension
- Perimeter fence

Langlade (Antigo)

- Snow removal equipment
- Snow removal equipment building
- T-hangar
- Aircraft apron
- Reconstruction of runway and taxiway pavements
- Installation of navigational aids
- Replace beacon

Oconto

- Snow removal equipment
- Seal coating pavements
- Fuel facility

Shawano

- Perimeter fence
- Snow removal equipment
- Land acquisition
- Automated weather observation system (AWOS)

Please let me know if you want me come and discuss this with the Township.

Best regards,  
 Stacey Miller

Kevin

Here is a list of Airports that have used their entitlement money from the BUREAU to maintain their Airports. I have talked to FOCA and they are willing to pay the town of Stephenson Local share, so there would be no cost to the town.

Also talked to the BUREAU about patching the cracks and seal coating the runway, this also could be covered by the BUREAU with no cost to township.

Thank you for your efforts toward the Airport
